

Every dot is the word 'bank' in a different sentence

Layer 0 (input embeddings)
PCA keeps 71% of the variance

Layer 12 (last layer)
PCA keeps 62% of the variance

```
show("ex1_step4_pca")
print(" Left : at layer 0 the dots differ only by position -> no sense structure.")
print(" Right: at the last layer the two senses form two separate clusters.")
```
