

What about Multimodality?

Learning a common “dense semantic space”

Language
model

Vision
model

Common space

```
graph LR; LM[Language model] --> CS[Common space]; VM[Vision model] --> CS;
```

The diagram illustrates the concept of a common dense semantic space in multimodal learning. It features two rectangular boxes on the left: the top one is labeled 'Language model' and the bottom one is labeled 'Vision model'. From the right side of the 'Language model' box, an arrow points diagonally down and to the right. From the right side of the 'Vision model' box, an arrow points diagonally up and to the right. These two arrows converge towards a central text label on the right, 'Common space', which represents the shared semantic space where information from both modalities is integrated.
