

Artificial Intelligence

Techniques and algorithms to enable machines to do things which typically require **human intelligence**.

- visual perception
- speech recognition
- decision-making
- language translation
- ...

Machine Learning

AI methods to enable machines to do learn autonomously from **experience**.

- linear regression
- support vector machines
- artificial neural networks
- decision trees
- ...

Deep Learning

Machine Learning methods based on the use of deep neural networks (DNN), i.e. neural networks having **many layers**.

- RNN
- LSTM / GRU
- CNN
- GAN
- ...
